

## TECHNICAL EVALUATION OF INJ. ANTI-D/SALT FREE ALBUMIN

### MINUTES OF MEETING. Dated 10/4/2018

Meeting of T&E Committee took place in Conference Room dated 10/4/2018 under the chairmanship of Dr. Zahid Askar, Chairman T&E Committee for the technical evaluation of Inj. Immunorho 300mcg (Anti-D) and Inj. Plasbumin 20% (Salt Free Albumin).

The evaluation conducted by notified committee was examined and agreed.

The institution has received only 01 offer for inj. Anti-D (Immunorho 300mcg) and Inj. Salt Free Albumin (Plasbumin 20%) which is frequently purchased through local purchase due to non-availability of approved rates in Govt. MCC 2017-18.

Therefore the committee unanimously agreed to proceed further for selection and approval of the said product following KPPRA Act 2012, and KPPRA Rules 2014, which under the Goods widely publicized through open Tender can be finalized even if a single bid has arrived as practiced earlier by the Govt of Khyber Pukhtunkhwa in the Tender of centralized rate contracting body i.e. Govt MCC.

The Manager Pharmacy gave instances of Inj. Streptokinase, Inj. Klaricid, Inj. Epival 500mg, Inj. Acyclovir 500mg and many others approved by the Govt in the MCC list following the KPPRA Rules and same can be followed at MTI-KTH as well in the best interest of the patient care and treatment.
